

Aetiol™ is a web & cloud based solution intended to reduce the new clinical trials for Pharma industry by providing a highly configurable and user friendly Clinical Trial Solution.

Capabilities

- 1 Web & Cloud-Based EDC
- 2 Easy to design, configure and validation setup for studies.
- 3 21CFR Part 11 compliant
- 4 Multi-site, Multi User Trials
- 5 Paper Trial Mode*
- 6 Customized Reporting and Dash Boards
- 7 Multiple formats for Data Extraction
- 8 Medical coding using Standard Medical Dictionaries
- 9 Audit Logs

Aetiol™ prioritises on quality, compliance and security. Aetiol™ adheres to following:

- 1 **21 CRF Part 11 compliant system**
 - Electronic Signature & Records
 - Secure Role based access
 - Audit Trail.
- 2 **HIPAA**
- 3 **ICH-GCP**

All studies are hosted on our highly-secure Web Based Applications, making them easily accessible from anywhere in the world using an Internet-enabled computer.

Data Security

Aetiol™ has the following security controls in place:

- 1 The Database access is restricted to Aetiol application.
- 2 Application access is strictly controlled through Role Based Access Control (RBAC).
- 3 Only the Authorized person can view/add/edit data.
- 4 System & Data access accountability is tracked in the system.
- 5 Secure protocols (SSL) is used for data transfer from client to server.
- 6 Data integrity is managed by system design, which does not allow deletion of any data in the system and logs all changes.

The advanced Offline Clinical Data Management Software

Aetiol™Capture : The advanced Offline Clinical Data Management Software (CDMS) for capturing, managing and reporting clinical research data.

About Aetiol-Capture:

Aetiol™Capture : The advanced Offline Clinical Data Management Software (CDMS) for capturing, managing and reporting clinical research data, optimizing data collection by efficiently streamlining clinical data collection process. The software has been designed to meet the needs of pharmaceutical companies & CROs, as well as research institutions and academic researchers.

Built on a highly scalable architecture and compliant with FDA 21 CFR Part 11, Aetiol-Capture is cost-effective, managing a unicentric or a large multicentric international clinical trial.

Advantages of Aetiol-Capture:

- User-friendly design & easy to use Graphical User Interface (GUI)
- Powerful and flexible software with broad control of database design and implementation.
- Rapid project development and deployment.
- Enhance data quality.
- Reduce costs and enhance efficiency.
- Allows you to setup forms, manage access/previlage rights and enter the data.

Why Aetiol-EDC & Aetiol-Capture:

SOLUTIONS DESIGN FOR

- PHARMA/ BIOTECH
- MEDICAL DEVICE
- VETERINARY
- CRO

BUILD YOUR OWN STUDY

- QUICK & EASY
- AFFORDABLE PRICING/ COST SAVING
- EXTENSIVE EXPERIENCE
- QUALITY CONTROL

Aetiol™-Encoder is Jade Global Solutions Medical Coding and Dictionary Management Software Solutions

About Aetiol-Encoder:

Aetiol™-Encoder is Jade Global Solutions Medical Coding and Dictionary Management Software Solutions that automates the process, enabling fast, efficient and consistent coding of medical terms. Aetiol-Encoder is a web/Cloud based coding and dictionary management system that codes verbatim terms (VTs) from different systems and maintains drug and medical dictionaries at a central location. Aetiol-Encoder automates the coding process by using advanced algorithms to support precise and rapid coding of adverse events, disease/laboratory terms, indications and drug verbatim terms.

Using Medical dictionaries (MedDRA), the Aetiol™- Encoding Module encodes verbatim text that has been entered into the eCRF. This dramatically reduces the time and effort required to encode medical data, and improves data management by raising and solving queries seamlessly. Built-in workflow for coding, VTA review and approval significantly reduces the setup time and ensures the system is ready-to-use right from the start. Users can understand the impact of a new MedDRA version with a single mouse click.

Advantage of Aetiol-Encoder:

SOLUTIONS DESIGN FOR

- AUTOMATES THE PROCESS, ENABLING FAST
- EFFICIENT AND CONSISTENT CODING
- REDUCES THE TIME AND EFFORT
- REDUCES THE SETUP TIME
- AND ENSURES THE SYSTEM IS READY TO USE

JGS is India Based Global Healthcare Technology Company

|| Industry we serve :

Pharmaceuticals

JGS is offering an efficient, unique and most innovative software solutions for the pharmaceutical industries worldwide with flexible data management services and at the same time being cost effective.

Biotechnology

JGS is unique in its approach to clinical software applications. Jgs is offering an efficient, unique and most innovative software solutions for the Biotechnology industries worldwide.

Medical Device Company

When it comes to medical device trials, JGS understands the unique needs that are generated during these types of studies.

About JGS:

JGS is India Based Global Healthcare Technology Company Specializing is eClinical Solutions & Pharma Enterprises Resource Planning solutions provider in the Space of Global Pharmaceuticals & Life Sciences Industry.

Jade Global Solutions stands for the solutions of pharmaceutical industry. JGS is working for most innovative software solutions for the pharmaceutical, medical device and life sciences industries of worldwide.

Our corporation, software and services have thorough understanding of technology and we work with collaborative approach with pharmaceutical industry.

UPCOMING PRODUCTS

AetiolTM - CTMS | AetiolTM - PV | AetiolTM - ERP(Pharma)

JGS has been at the forefront of the market by responding to customer's demands, for robust quality product and services.
